Warning labels are expected to survive the rigors of weather, UV degradation and yet remain readable for many years. UPC uses the most advanced production processes and the RIGHT materials to insure that your message is readable after many years, even in the most hostile environments. And our automated process assures quick turn-around of your approval artwork and orders. UPC's Warning Labels:

- Eliminate the "I didn't know" excuse for unauthorized entry.
- Reduce liability in event of injury resulting from unauthorized entry.
- Meet ANSI C12.7-1993, 6.13 Safety Alert markings requirements.
- Aluminized Mylar® label with Mylar® protective coating provide superior weather, abrasion and UV protection.
- P1212 adhesive insures excellent adhesion to most clean surfaces, including enameled steel, bare aluminum, fiber glass and plastic.
- Vinyl Warning Labels are a low cost alternative for application on glass or polycarbonate surfaces.
- Applications include:
 - Electric meters
 - Meter sockets
 - Electrical enclosures
 - Gas meters
 - Water meters
 - CATV apparatus
 - Telecommunication enclosures
